

# Benefits of Working with us

---

By choosing to work with us, we at Randa Gabriel, emphasize on delivering you fast work accomplishment combined with True expertise and Quality Work. While ensuring that your Confidentiality is maintained and your Risk Management is secured, we provide you with our best quote as independent business analyst Consultant in BPR (Business Process Re-engineering) Consultancy.

## **True expertise:**

We know this area in business analysis very well and our experience and expertise is better than anybody we know in this particular niche area. This is because we have a strong Business Vision, a talent. With continuous research we have maintained and developed our expertise in the field. By choosing us, you benefit from designing a cost effective system of work, supportive in the long run, and you become a learning organization with good corporate governance. Consequently, your business processes will elevate from solo working practices to distant smooth running of your operations.

## **Quality of work:**

Most of our competitors build on structure that has the partners selling the jobs and new hires, bright young people without a lot of experience, delivering. This is not our case, ultimately the work is our own, and is finalized by Mss. Gabriel in person. Big firms, in order to meet market needs, might have created a group within their firm that specializes in areas of the work. While this is good for the big firms because it creates an appearance of specialization, which to a large degree is correct, unless you are General Motors or Pepsi, the large firms are unable to give the level of attention that many companies, particularly start-ups require. We at Randa Gabriel, handle a manageable size of portfolio projects where our customers are all satisfied and benefit from 80% plus care because they don't fall to the rule of 80/20.

## **Confidentiality, Risk management and capabilities:**

With us, you can better safeguard confidentiality issues. Of course dealing with LexisNexis or Young sounds more polished and secured, however the risk of choosing us is close to zero, there is nothing to be lost from your part other than the try. And to convince you more about our capabilities, we are not going to suggest to you to visit our testimonial page or to talk with our reference, instead we are willing to offer you a free of charge 1 week of work where you can test our capabilities and get the live assurance we are the right consultant for the job.

**Free of charge add-in services:**

Randa Gabriel Consultancy is not commercial in business ethics but as well is not Caritas. With us you can benefit from free of charge services and helpful tips. Soon our community e-store will allow you to download free samples of our work, free letters, free helpful tips, and many other free posts aimed to elevate learning and efficiency at the community level.

**Pricing and speed of work:**

Due to fast delivery of the service, we at Randa Gabriel remain cheaper in saving you money or the least money in terms of time. This is due to absence in red tape policies and hierarchies and to our well organized work methodology and strong business vision.
